General cleaners

This product is acceptable for use as a general cleaner for food processing areas. The product is not intended for direct food contact. Prior to use all food and packaging material should be removed or covered when the compound is used in the food processing areas. After the use the cleaned area should be thoroughly rinsed with potable water and shall neither exhibit a noticeable odour or leave visible residue.

Use the product according to the manufacturer's instruction and applicable label directions. The amount used should be the minimum required to accomplish the desired technical effect.
