Coatings for use on direct food contact surfaces

This product is acceptable for use as a coating for use on direct food contact surfaces in processing, transporting, or keeping food products around food processing areas. The products must be kept in their original state and according to the formula compliant with 21 CFR Section 175.300.

Use the product according to the manufacturer's instruction and applicable label directions. The amount used should be the minimum required to accomplish the desired technical effect.
